

## Waka Tīwai : Auckland

### *What it's about:*

#### **Planning for Gifted Provision using a Multidimensional Model**

This hui will be on using a multidimensional model to plan units for gifted learners. We will go through a planning model step by step to ensure our learning activities cater to the needs of gifted learners in an engaging manner. This model can also be used to differentiate mainstream and existing units. We will look at why it is important for students to open their minds, establish our data, explore ideas, examine thinking and evaluate learning.

### *Meet your Facilitators:*

Your facilitators are Sylvie Howell & Charlotte Osorio

Sylvie has been interested in gifted education for a long time, it started with a teaching scholarship and International Baccalaureate. She is now the Gate Coordinator at Green Bay High School and runs enrichment classes for year 9 and 10 students. She enjoys spending time with her family and friends.

Charlotte is the Head of Diverse Learning at Kristin School, leading the provision for gifted and talented learners from Years 7-13. Prior to joining Kristin School in 2017, she was an Education Consultant and PL Facilitator for Te Toi Tupu and Cognition Education, providing professional learning in gifted education across both the primary and secondary sectors. Charlotte graduated with a Masters of Education, specialising in Gifted Education, from Monash University in 2013. She originally trained and worked as a History and Social Studies teacher and currently teaches IB DP Psychology and Theory of Knowledge.
